Subject: Revised approval for Roth tanks in Virginia

Bruce

The existing VDH GMP #133, which approves the use of FRALO SEPTECH tanks (now called Roth MultiTanks)) as septic tanks in Virginia will be revised to reflect the purchase of FRALO by Roth Global Plastics.

In addition, approval for the use of the tanks as wet wells (pump tanks) will be added to the GMP. Please send me any available drawings, capacity charts, installation instructions, etc. for potential attachment to the revised GMP. Thanks.

Tom
