

Septic Tanks NOT Meeting Minimum Standards and Requirements for Automatic Use in Wyoming

(September 12, 2007)

but

Which May be Used on an Individual Basis with Sufficient Justification

“B - List”

The following septic tanks are NOT in compliance with the minimum standards and requirements for septic tanks for use in Wyoming as specified in Chapter 11, Section 39 of the Water Quality Rules and Regulations (WQR&R). However, these tanks will be considered on an individual case basis provided that a reasonable justification is given, such as: low profile tank (i.e. – liquid depth less than 48”) needed because of shallow groundwater or bedrock, or other engineering reasons, or as a last resort show that the use of any other “A – List” tank would create an unreasonable cost to the applicant.

The septic tanks listed below are all less than the required 48” minimum liquid depth. They have been evaluated under Section 5, Chapter 11 of the WQR&R which allows for the consideration of equipment that deviates from the specific regulations of Chapter 11 but maintains the intent of the regulations. The tanks listed below have been approved on the basis that they are at least 36” or more in depth, and must be two compartment tanks.

Septic Tank Clean-Out Riser Requirement - Either a 6-inch diameter clean-out riser or the manway from each compartment of the septic tank must be extended to the ground surface from all septic tanks.

Cody Precast & Septic Service - Cody, Wyoming. 1000 gal Low Profile two compartment

Colorado Precast - Loveland , Colorado. They supply RMI Tanks.

Copeland Concrete, Inc. – Rifle, Colorado: 1000 & 1500 gal Low Profile two compartment

FRALO Plastech Manufacturing, LLC – Syracuse, New York: 1060, 1250, & 1500 gallon two compartment “SEPTech” Brand HDPE tanks.

RMI Tanks - Denver, Colorado: Rotationally molded polyethylene septic tanks – must follow manufacturer's instructions and precautions regarding filling tank with water during burial and immediately after pumping. 1000 gallon two compartment.

Snyder Industries, Inc. - Marked Tree, Arizona: 1000, 1250, and 1500 gallon “NuConSept” Model Low Profile two compartment polyethylene tanks.

Wind River Ready Mix - Riverton, WY: 1000 gal “Norwalk” Low Profile two compartment.
