

The **FRALO** Advantage

Do you design and build to the bare minimum standards? We didn't think so. That's why FRALO tanks are built to exceed even Florida's tough Category 4 requirements.

According to third-party certification by the State of Florida and ASTM 1227 specifications for pre-cast concrete tanks, here is how FRALO tanks stack up when vacuum tested:

Tank Type and Specification	Test Point	Safety Factor Test Point
FRALO PLASTECH Florida Category 4 Certification	5" Hg	7" Hg
Pre-cast Concrete ASTM 1227 Standard	4" Hg	5" Hg
Concrete & Other Poly Tanks Florida Category 3 Certification	2.2" Hg	3.1" Hg

1" Hg is approximately equal to 9" of soil cover.

We know you want to design better and build better, so specify FRALO blow-molded tanks on all your onsite wastewater projects. We know you stand behind your work and believe in what you do... so do we.

Believe in Blue
