

SNOW AND ICE-MELT SYSTEMS

ROTH INDUSTRIES

- world leader in radiant hydronic heating systems
- latest, most efficient heating system in the world
- guarantee of superior technology
- innovative design and highest-quality materials
- full system provider
- assists you with all technical and design needs throughout the project including heat-loss calculations and easy-to-follow installation manuals

Cross-section of a typical Roth Snow and Ice-Melt System

Major installations at commercial centers, stadiums, airports, malls...

SNOW AND ICE-MELT SYSTEMS

GET READY TO GIVE WINTER THE COLD SHOULDER

- Very safe and can reduce potential liability and insurance premiums
- Professional support from planning through design and installation
- Environmentally Friendly
- Practical
- Efficient
- Complete System

The Roth Complete System

Roth Pex-c Tubing

sizes 3/8", 1/2", 5/8", 3/4" and 1"

Snowmelt Enable Kit

Includes a hydronic system controller, outdoor sensor, universal sensors and a remote start/stop module.

Outdoor Sensor

Universal Sensor

Remote stop/
start module

Slab Sensor

Cooper Manifolds

1 1/2" and 2" with 6 branches with end cap
